Projects

Repair Shop | *Vue.js, Spring Boot, TypeScript, Tailwind CSS, MySQL, Docker*

Full-Stack Project

- Developed a containerized Full-Stack SPA with Docker.
- Implemented secure authentication and Role-Based Access Control (RBAC) using Spring Security.
- Built complete CRUD operations connecting the backend and the database.

Download Stats Panel | *PHP, MySQL, JavaScript, CSS, Docker*

Back-End Project

- Created a Full-Stack platform with manual MVC architecture and Docker deployment.
- Developed an analytical dashboard with interactive charts.
- Integrated a secure authentication system.

Dom Books | *Vue 3, Tailwind CSS, Pinia*

Front-End Project

- Programmed a reactive SPA with global state management using Pinia and LocalStorage.
- Implemented complex form validation using VeeValidate and Yup.
