## Skills

- **Web languages and technologies:** Java, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3
- **Frameworks and libraries:** Spring Boot, Vue.js, Astro, Laravel, Tailwind CSS, Bootstrap
- **Databases:** MySQL, PostgreSQL
- **Servers and deployment:** Docker, Linux, Nginx, Apache, AWS, Cloudflare Pages
- **Tools and security:** Git, Figma, Postman, OWASP Top 10, Spring Security (RBAC)
- **Languages:** Spanish (native), Valencian (proficient), English (intermediate)

## Projects

**EcoNane** | Vue.js, Tailwind CSS, Supabase, Cloudflare, Resend

### Production Web Project

- Interactive SPA catalog and private admin dashboard for autonomous management.
- Secure ephemeral link generation with IDOR mitigation using mobile PIN validation.
- Strict form input sanitization and protection against XSS injections and spam.

**Repair Shop** | Vue.js, Spring Boot, TypeScript, Tailwind CSS, MySQL, Docker

### Full-Stack Project

- Developed a modular, containerized Full-Stack SPA with Docker.
- Implemented secure authentication and Role-Based Access Control (RBAC).
- Built a RESTful API with optimized MySQL relational database persistence.

**Download Stats Panel** | PHP, MySQL, JavaScript, CSS, Docker

### Back-End Project

- Created a Full-Stack platform with custom MVC architecture and Docker deployment.
- Developed an analytical dashboard with interactive charts and SQLi protection.

## Experience

### Sollutia

#### Web Developer

- Responsive web layout design using HTML5, CSS3, and Bootstrap
- Full development of web application features within an agile team workflow
- Backend implementation using PHP and MySQL relational database management
- Frontend programming with JavaScript and jQuery to enhance interactivity
- Collaboration with the technical team throughout the development lifecycle

**Alcoy, Alicante (hybrid)**

March 2025 – June 2025

### Coratge

#### Web Developer

- Creation, deployment, and customization of a website using WordPress
- Web hosting, domain setup, and SSL certificate management on Webempresa
- Technical web performance optimization (WPO) and organic SEO best practices
- Implementation of active security measures, CMS hardening, and anti-spam
